

A Memo to the SORA Community

JULY 2022

This document accompanies the invoice sent to SORA for the services provided by SORAMITSU.

July 2022 was an incredible month of accomplishments, including the implementation of the SORA integrated plan that set a development roadmap that helps foster transparency and accountability for the development pipeline for the SORA network.

This memo will provide a perspective on the completion percentages of the activities for each track, along with a description of the development activities specific to this month, as well as the total amount of hours presented in invoice number 205016 served by SORAMITSU Helvetia to the SORA Community.

1 SORA (Substrate) – 3,855 hrs

The scope of work for SORA includes the release of a new runtime, work related to the metadata update to Substrate 4, and the successful implementation of the SORA Kusama Parachain. On the mobile application front, new functionalities were released including referrals and multi-accounts.

1.1 SORA Backend

- Released version 1.4.4
- New transaction fees (x100) for TBC collateralization
- Minor Ceres release
- Migration to Substrate 4
- Work continues on EVM Trustless bridge to Ethereum
- Work on building the bridge between SORA Mainnet and SORA parachain
- Work on setting up HRMP channels with other parachains
- Minor fixes
- Work on processes (development, testing, release)

1.2 Mobile App

- Work on processes (development, testing, release)
- Work on data-driven development initiative

1.3 Android:

- Work on 2.5.0 - Referral system & Multi-accounts
- Work on 2.5.1 - Node selection & Export accounts
- Work on migration to Substrate 4

1.4 iOS:

- Work on 2.5.0 - Referral system
- Released Multi-accounts iOS
- Fixing bugs on 2.4.0 - Polkaswap Pools before release
- Work on migration to Substrate 4

2 Substrate (PSWAP) - 1,043 hrs

Polkaswap has received a substantial amount of ongoing improvements, including:

- Work on filtering for account assets (NFT, Whitelisted tokens, Hide zero balances)
- Work on notifications for received tokens (Notification API)
- Add liquidity/create pair were simplified
- ROI calculation improvements
- Tokens page v.2 improvements
- Charts improvements
- The desktop version of Polkaswap was up to date, work on it has been resumed
- Work on Trustless bridge API (draft implementation)

3 DevOps and Security - 400 hrs

The work done this month by DevOps covers the SORA network as well as its underlying infrastructure, here are more details:

- Bridge monitoring and alerting are improved
- CI updated for substrate4
- Trustless EVM Bridge dev and stage environments are deployed
- SORA wallet CI/CD improved:
 - Separate feature testing possibility added
 - Notifications added
- Monitoring of processes evolved, and more metrics and dashboards added
- The coverage report configuration is updated
- Sorascan is improved, metrics and alerts set up
- Token whitelist CI/CD set up, now we host it in IPFS
- The pricing service is updated with new alerting rules and metrics
- Ceres bug bounty program is live now
- All SORA bug bounty reports are processed

4 Education – 369 hr

Education operations carried out this month include the implementation and maintenance of SubSocial content for SORA, and educational materials.

The supporting content and collaterals for the three Ecosystem updates that have covered the SORA Integrated Plan are also included in the work corresponding to the month of July.

Ongoing work to keep the SORA wiki up to date with new developments and maintenance work to ensure content is relevant, helpful, and accurate.

5 Total Hours – 5,667 hr

Additionally, invoice 205015 attached pertains to cloud server costs for the month of July 2022.

Your ongoing support is greatly appreciated and we look forward to continuing to serve you.

Sincerely,

SORAMITSU Helvetia AG

Supporting updates to the concepts are presented in the Ecosystem Updates published on July 1st, July 14th, and July 27th respectively.
