SOLUTIONS

# A MEMO TO THE SORA COMMUNITY

FEBRUARY 2024

*This document accompanies the invoice sent to SORA for the services provided by Ceres Blockchain Solutions.*

*This memo will provide a description of the products, and the total amount of hours presented in invoice served by Ceres Blockchain Solutions to the SORA Community.*

*The services performed include the design, development, testing, and maintenance of the following products: Ceres Tools Website, Ceres Tools Mobile Apps (iOS and Android) and Apollo Protocol.*

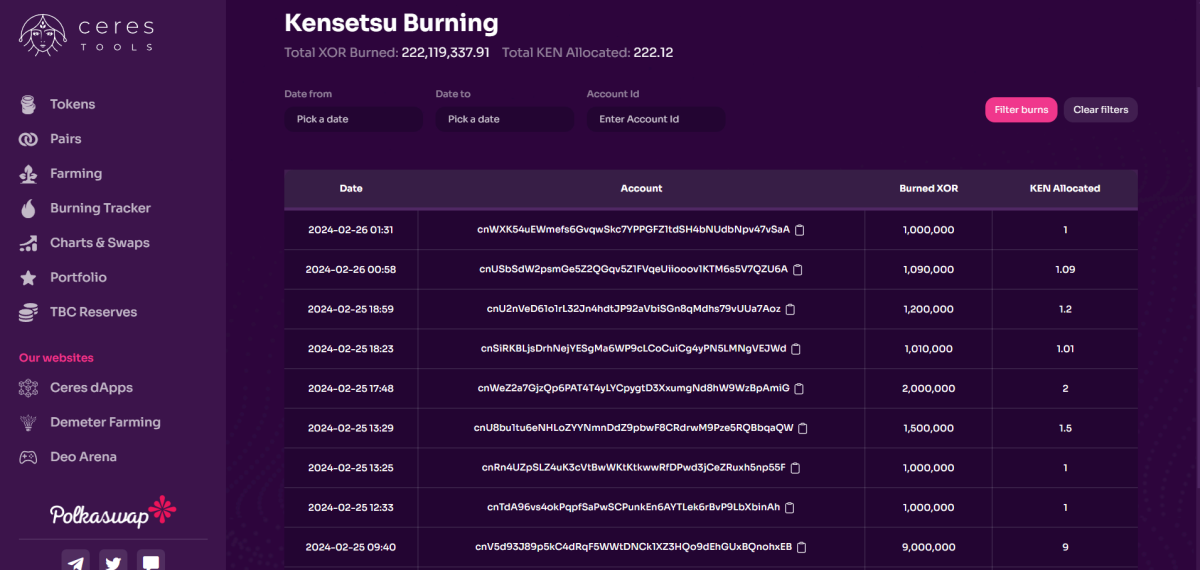

# 1 Ceres Tools Website – 108 hrs

Ceres Tools (<https://tools.cerestoken.io>) is a platform for tracking data from Polkaswap Decentralized Exchange (<https://polkaswap.io>).

Platform consists of six sections: **Tokens, Pairs, Farming, Burning Tracker, Portfolio, Charts & Swaps** and **TBC Reserves**.

## 1.1 Tokens

Token prices listed on Polkaswap, their asset IDs, and token locks are displayed in the Tokens section. In this release, a Kensetsu burning tracker has been added (users can track how many XOR is being burned for Kensetsu allocation). KEN (Kensetsu) will be allocated to accounts on the SORA network that burn at least 1 million XOR before block 14,939,200, at a rate of 1 KEN per 1 million XOR burned.

Total XOR Burned: 222,119,337.91		Total KEN Allocated: 222.12

## 1.2 Charts & Swaps

In the Charts part of the section, users can track the price movement of tokens listed on Polkaswap, as well as perform a Technical Analysis using various indicators. In the Swaps part of the section, users can track swaps (buys and sells) for each token on Ceres Tools. Users are able to track swaps for all tokens at once and can filter the swaps with date\_from,

date\_to, min\_amount, max\_amount and token filters. In this release, there are two new features.

The first one is a long-awaited feature - Volume on charts. From now, users can see volume on the charts for each period.

The second one is the 'exclude accounts' filter. Users can exclude some accounts from Swaps (for example, some bots that are spamming transactions).

## 2 Ceres Tools Mobile Apps – 18 hrs

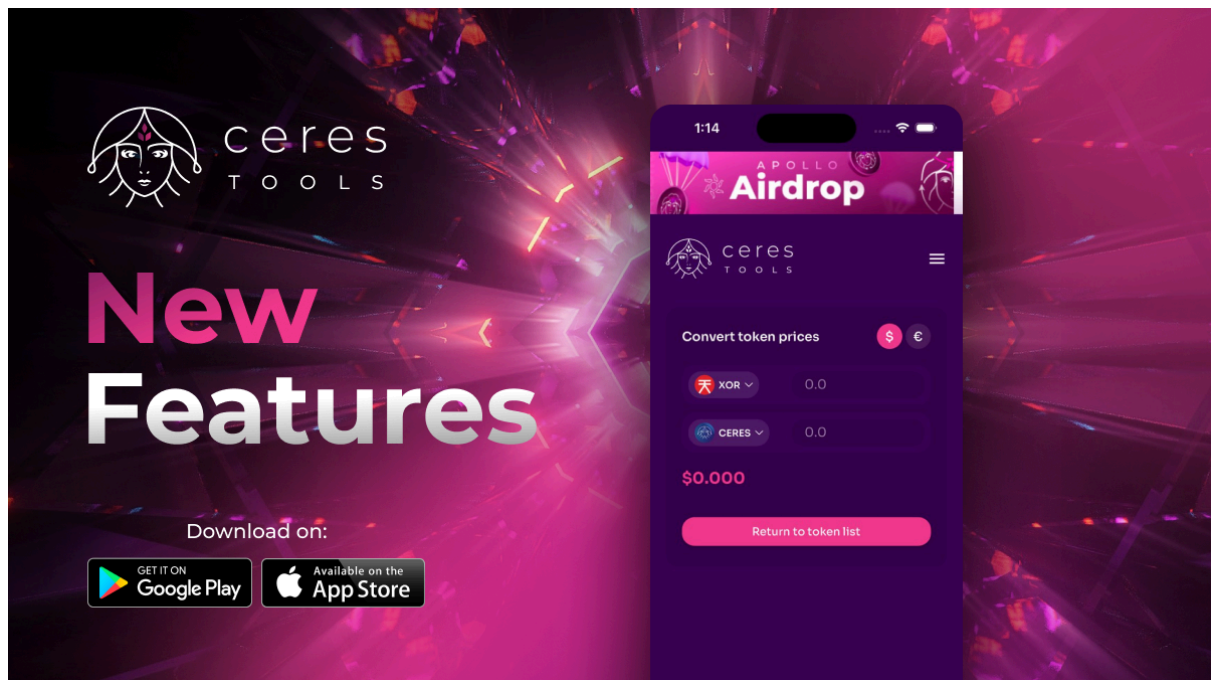

Ceres Tools Mobile App is a Ceres Tools Website version as a mobile app. It is available for both Android and iOS. From this release, users can enjoy all the functionalities that have been added to the Ceres Tools website.

Ceres Tools Android App –

<https://play.google.com/store/apps/details?id=io.cerestoken.tools>

Ceres Tools iOS App –

<https://apps.apple.com/gb/app/ceres-tools/id1590032285>

## 3 Maintenance, issues and bug fixing – 30 hrs

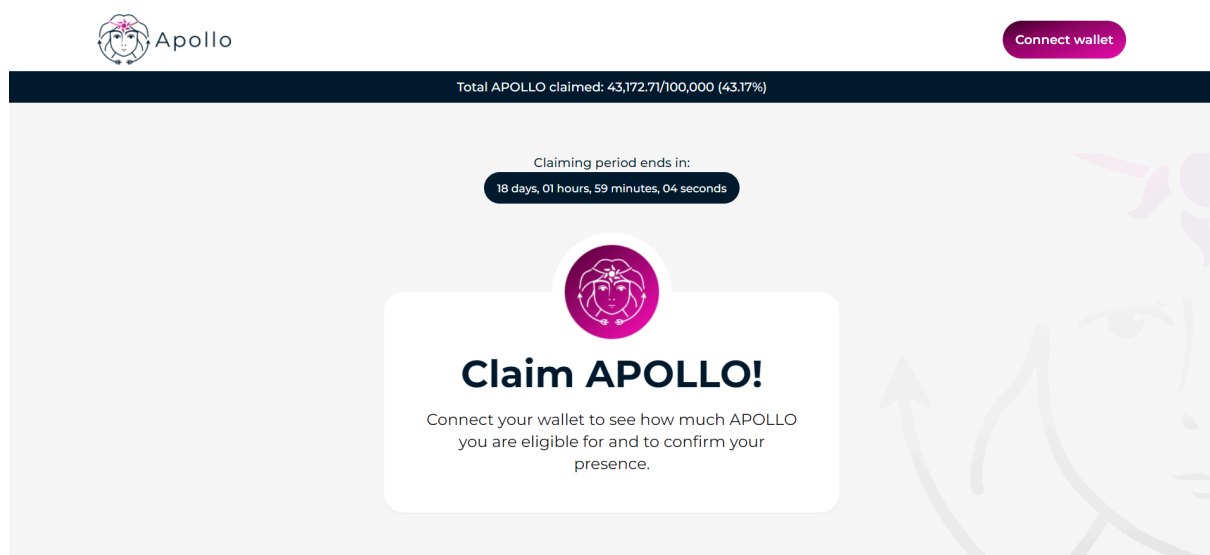

## 4 Apollo Protocol – 275 hrs

The Apollo Protocol is the first lending and borrowing platform on the SORA network. Apollo enables its users to deposit and borrow assets on the SORA network. Depositors can provide liquidity and secure passive income through interest, while borrowers can leverage their assets without selling them and pay interest for this service.

Read more about Apollo Protocol on <https://apollo-protocol.gitbook.io>.

Regarding the blockchain part of Apollo Protocol, it is in the unit testing phase at the moment. Launch on testnet is expected in the next month.

Apollo claiming page is live on <https://apolloprotocol.io>. Users will be able to claim their allocation until 15/03.
