

# SORA Treasury Proposal

Ceres Tools Mobile Apps (iOS and Android)

Ceres Tools Website

Ceres Polkaswap Telegram Bot

**Proponent:** Ceres Blockchain Solutions LLC

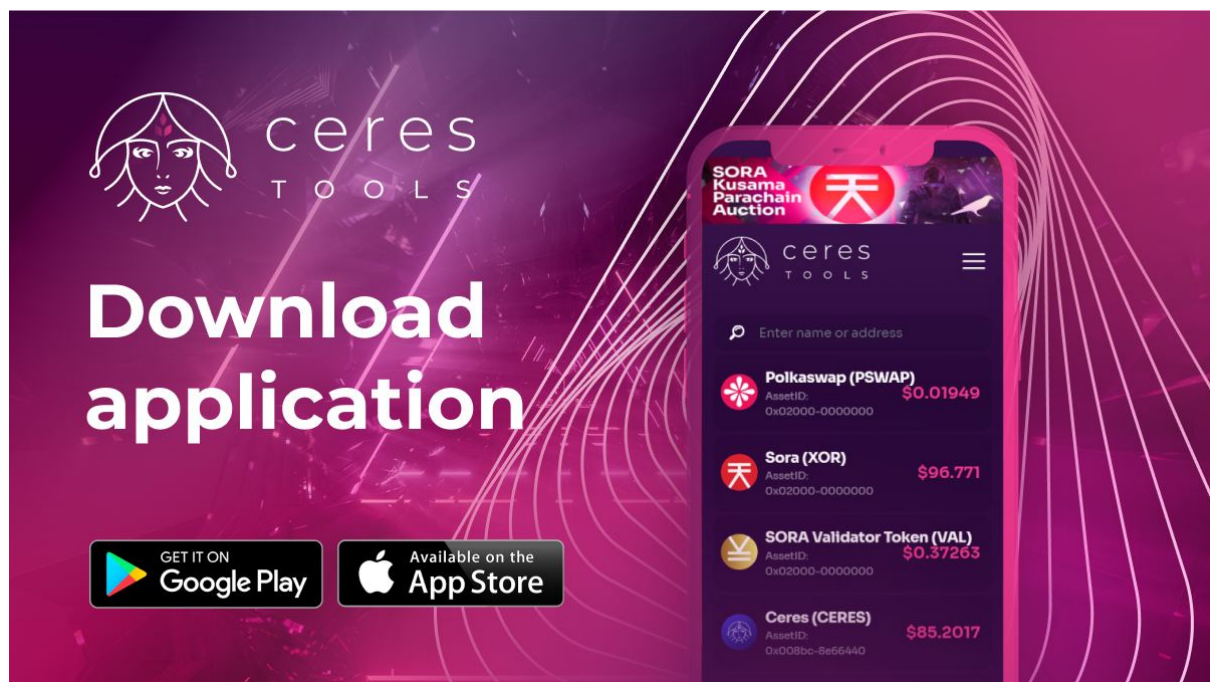

**Date:** April 2023 (submission)

**Requested allocation (USD):** \$190,000 (considering the target price of TBCD token which is 1\$; current price is 0.69\$)

**Requested allocation (TBCD):** 190,000

**Payout address:**

cnULzhJufsXR9xEyFajG8DyJd2U338GRhowgY6sZEtbTgk18u

## Why are we asking for funding now?

We are asking for funding now because the tools infrastructure improvement is finally finished, which was worked on for the last 6 months approx. We have upgraded the technologies to be up-to-date with current state-of-art, and also fixed the bugs. We didn't want to ask for funds before that job was done. We can finally state that all these features have

been completed in the best possible way. Now everything seems working perfectly, there are no reported bugs neither on the app, nor on the website, burning tracker, nor the bot so we think it's the right moment for proposal.

### **Proposed functionality for the Ceres Tools Mobile Apps (iOS and Android), Ceres Tools Website and Ceres Polkaswap Telegram Bot**

Ceres Tools is a platform for tracking data from Polkaswap Decentralized Exchange (polkaswap.io). Platform consists of five sections: **Tokens**, **Pairs**, **Farming**, **Burning tracker** and **Charts**. Prices of tokens listed on Polkaswap are shown in **Tokens**. **Pairs** section is intended for liquidity, 24hr volume and pool details for each pair as well as total liquidity and total 24hr volume on Polkaswap. In the **Farming** section users are able to keep track of farming APR for Polkaswap pools. With **Burning tracker\*** users can track PSWAP burning data, supply movement and get basic information about Polkaswap DEX. In the **Charts** section, users can track price movement of tokens listed on Polkaswap as well as doing a Technical Analysis using various indicators.

**Ceres Polkaswap Telegram Bot** is a bot through which users can very easily and quickly get the price of any token listed on Polkaswap.

\* Creation of Burning Tracker section has been sponsored by PoCoCo but not maintenance of it.

Throughout the existence of the Ceres Tools Website, it has been visited by several thousand users.

Ceres Tools Mobile Apps have been downloaded more than 1,500 times.

### **Plans for the future**

For the upcoming months, we plan to create proposals monthly. There is a lot of space for Ceres Tools to be more useful for the community. Some of the ideas: add more details for each token (supply, website, twitter...), add 1D, 1W and 1M charts, add buy buttons redirecting to Polkaswap, add my portfolio option for desktop and mobile version, potentially create governance for tools where proposals could be made for adding new project banners, listing new tokens, pushing pairs on the list, voting would

be done with XOR token... First of all, we want to hear the community's suggestions for what features they would like to see on Ceres Tools.
