SOLUTIONS

# A MEMO TO THE SORA COMMUNITY

MAY 2023

*This document accompanies the invoice sent to SORA for the services provided by Ceres Blockchain Solutions.*

*This memo will provide a description of the products, and the total amount of hours presented in invoice served by Ceres Blockchain Solutions to the SORA Community.*

*The services performed include the design, development, testing, and maintenance of the following products: Ceres Tools Website and Ceres Tools Mobile Apps (iOS and Android)*

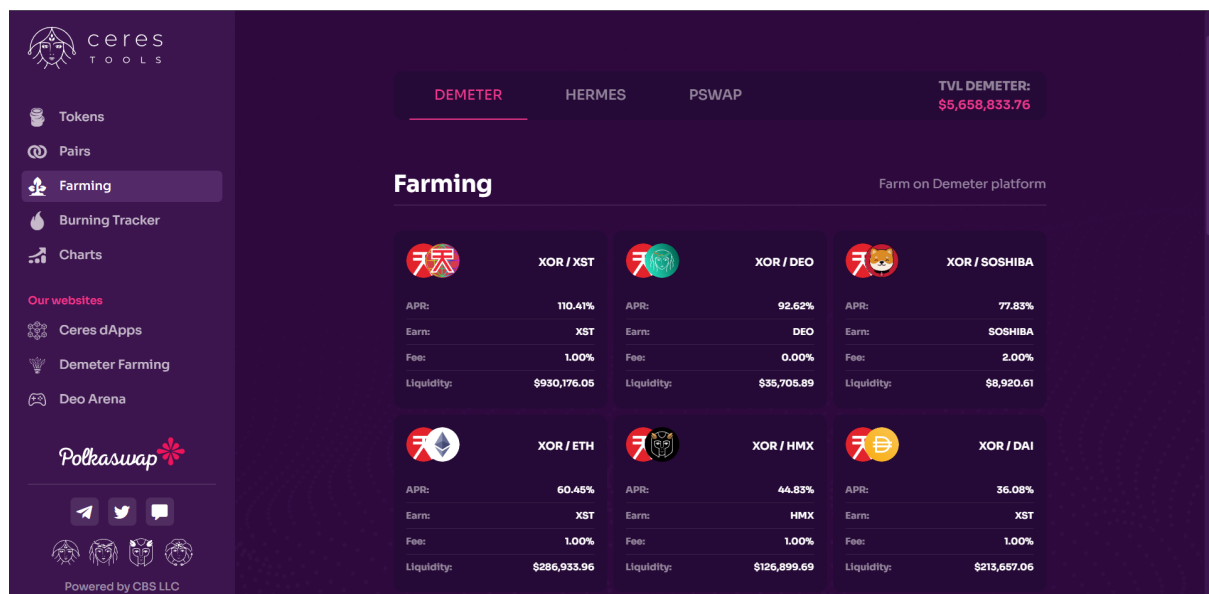

# 1 Ceres Tools Website – 131 hrs

Ceres Tools (<https://tools.cerestoken.io>) is a platform for tracking data from Polkaswap Decentralized Exchange (<https://polkaswap.io>).

Platform consists of five sections: **Tokens, Pairs, Farming, Burning tracker** and **Charts**.

## 1.1 Farming

Until now, users could only track Farming APR for Polkaswap pools. As a new feature, Demeter and Hermes farmings have been added too. Now, users can track all farmings and stakings on SORA in one place.

## 1.2 VAL Burning Tracker

We have started to work on the long-requested and long-awaited VAL Burning Tracker. What has been done so far is the fetching of data on VAL burning from the beginning of the SORA network until now.

## 1.3 Portfolio Tracker

A portfolio tracker is in the process of being implemented, which will allow users to connect their wallet and monitor the movement of their portfolio in the previous 24h, 7d, 1M and so on.

## 2 Ceres Tools Mobile Apps – 8 hrs

Ceres Tools Mobile App is a Ceres Tools Website version as a mobile app. It is available for both Android and iOS.

Ceres Tools Android App –

<https://play.google.com/store/apps/details?id=io.cerestoken.tools>

Ceres Tools iOS App – <https://apps.apple.com/qb/app/ceres-tools/id1590032285>

New Farming section has been integrated in the mobile apps.

## 3 Maintenance – 8 hrs

Maintenance includes updating the TradingView chart library, minor design changes and bug fixes.
