CERES BLOCKCHAIN SOLUTIONS

A MEMO TO THE SORA COMMUNITY

APRIL 2024

This document accompanies the invoice sent to SORA for the services provided by Ceres Blockchain Solutions.
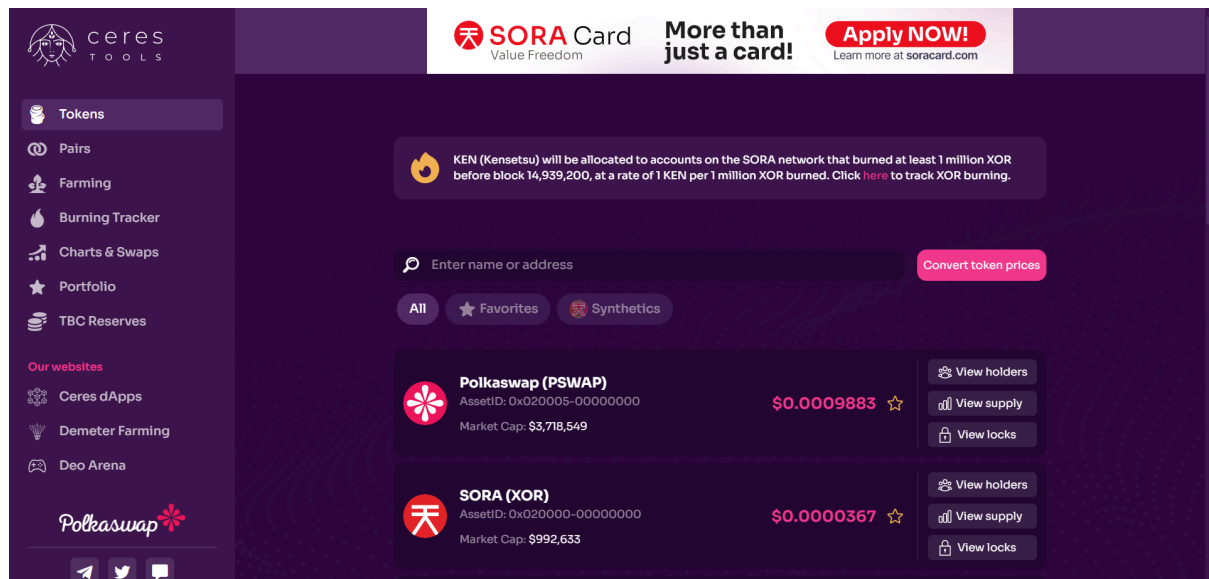

This memo will provide a description of the products, and the total amount of hours presented in invoice served by Ceres Blockchain Solutions to the SORA Community.

The services performed include the design, development, testing, and maintenance of the following products: Ceres Tools Website, Ceres Tools Mobile Apps (iOS and Android), Apollo Protocol and DEO Arena v2.

1 Ceres Tools Website

Ceres Tools (https://tools.cerestoken.io) is a platform for tracking data from Polkaswap Decentralized Exchange (https://polkaswap.io).
Platform consists of six sections: **Tokens, Pairs, Farming, Burning Tracker**, **Portfolio**, **Charts & Swaps** and **TBC Reserves**.

2 Ceres Tools Mobile Apps

Ceres Tools Mobile App is a Ceres Tools Website version as a mobile app. It is available for both Android and iOS. From this release, users can enjoy all the functionalities that have been added to the Ceres Tools website.

Ceres Tools Android App –
https://play.google.com/store/apps/details?id=io.cerestoken.tools
Ceres Tools iOS App –
https://apps.apple.com/gb/app/ceres-tools/id1590032285

3   Maintenance, issues and bug fixing – 20 hrs

4   Apollo Protocol – 304 hrs

The Apollo Protocol is the first lending and borrowing platform on the SORA network. Apollo enables its users to deposit and borrow assets on the SORA network. Depositors can provide liquidity and secure passive income through interest, while borrowers can leverage their assets without selling them and pay interest for this service.
Read more about Apollo Protocol on https://apollo-protocol.gitbook.io.

Regarding the blockchain part of Apollo Protocol, the pull request has been reviewed, approved and merged by SORA devs. Apollo pallet is on the testnet now.

The development of backend and frontend is ongoing. The mainnet launch of Apollo Protocol is expected to be in May.

5 DEO Arena v2 – 176 hrs

The DEO Arena is the first Play-to-Earn game on SORA. In-game currency is the SORA-native token Demeter (DEO). Players spawn in the arena and the goal is to eliminate opponents using different weapons. Each player enters the match with a certain amount of DEO tokens, which are taken by the winner at the end.

DEO Arena stats so far:

- More than 15,000 matches played
- More than 40,000 DEO burned
- More than 40,000$ distributed in rewards

At the insistence of the community, we started the development of DEO Arena v2. This version in the form of Battle Royale Multiplayer will look better and will be much more advanced, fun and playable than the first version. More details are coming soon.
